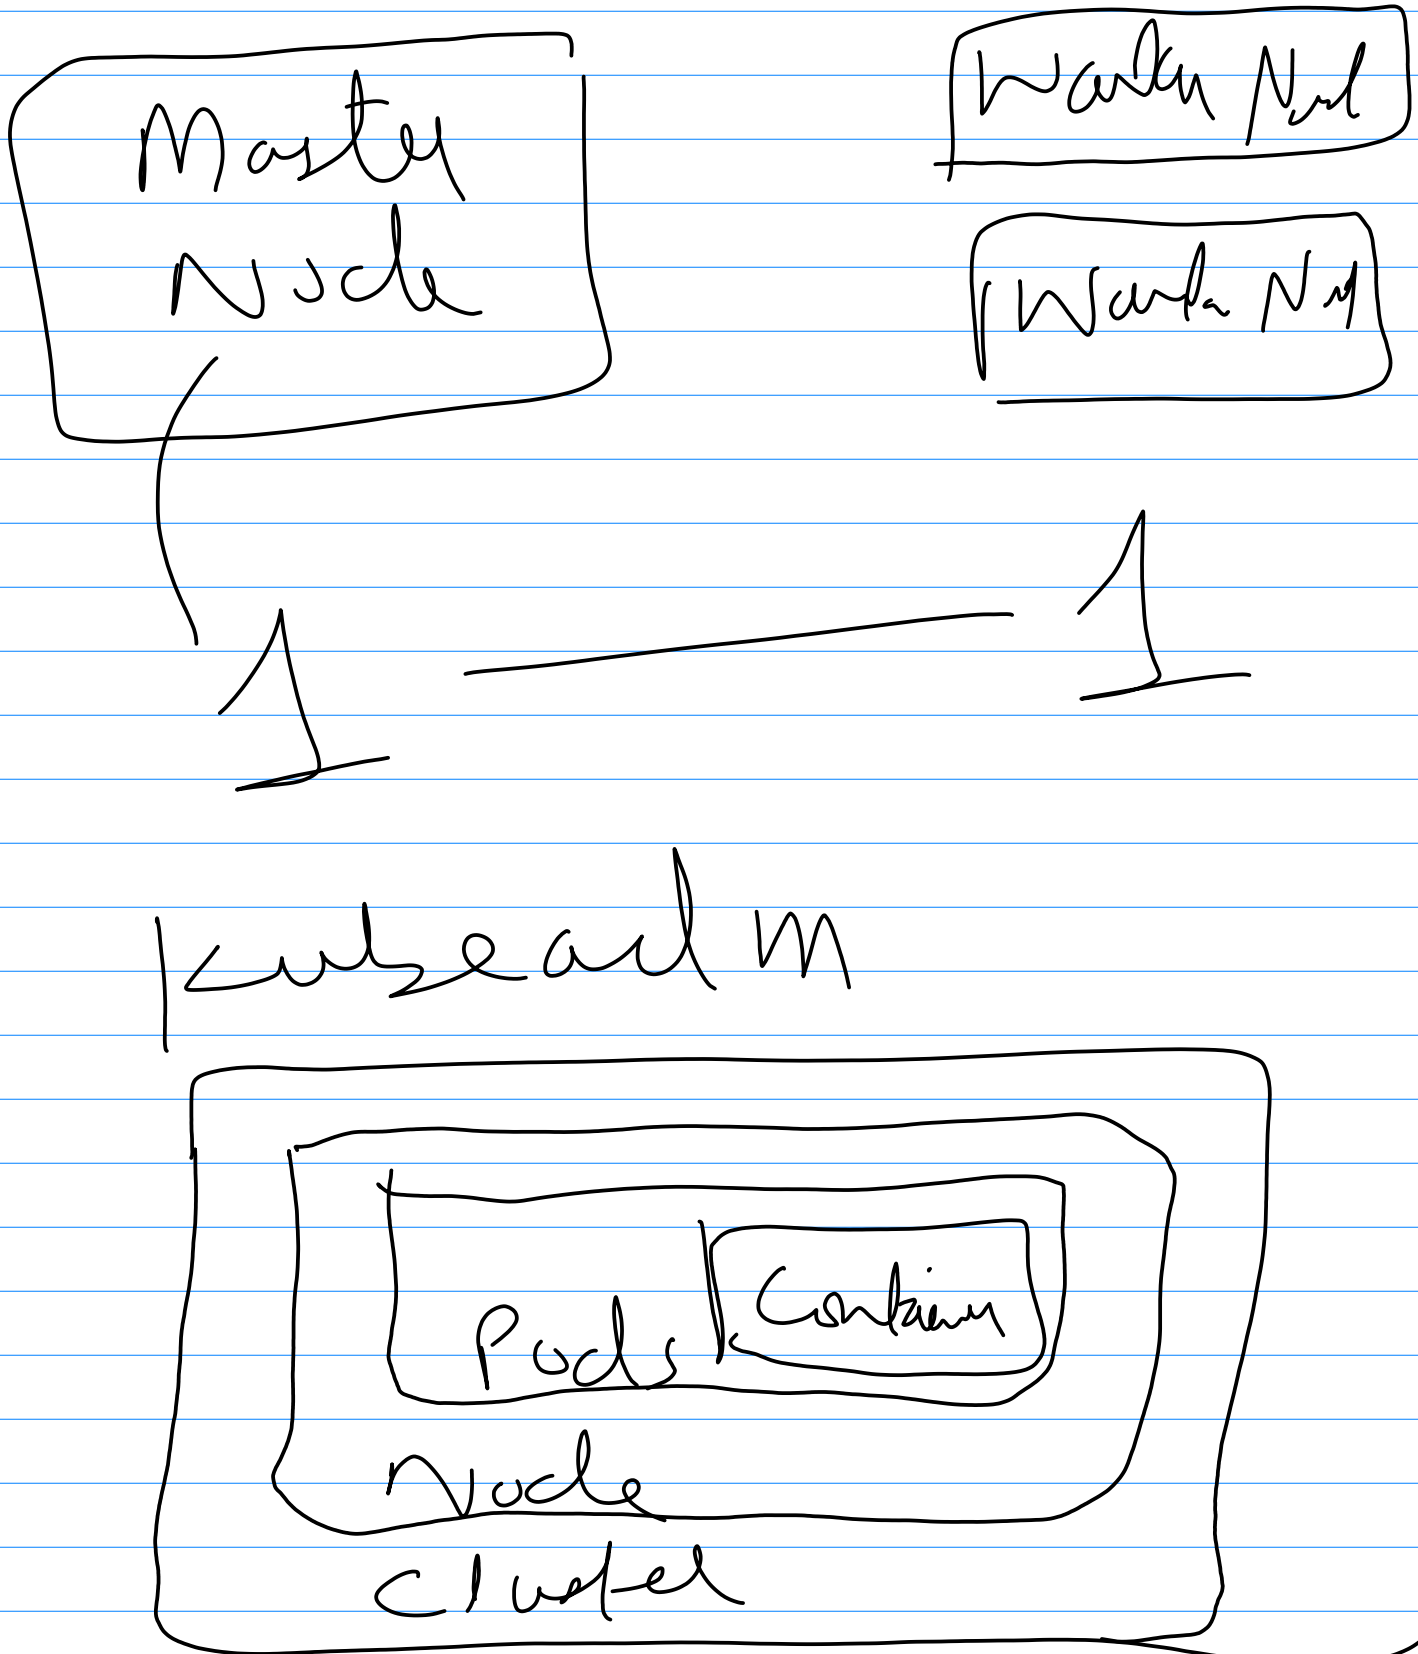
Week-15-5

Kubernetes —>



PODS :-

- Containers ——> inside Pods
- containers without Pods = ✗

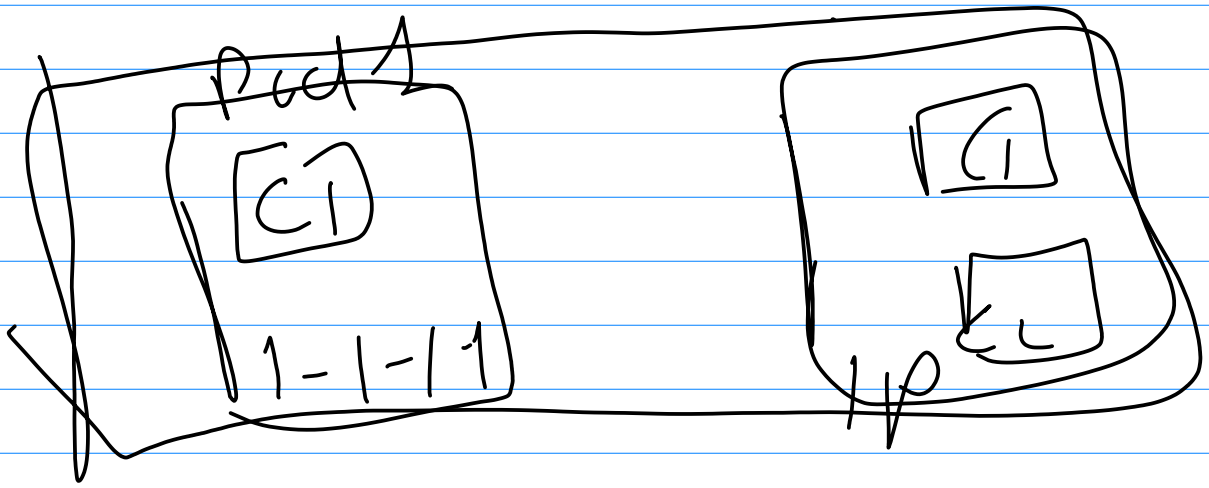
Pod & Container Relationship

Most of the time = 1 — 1

Pod — Virtual Machine

IP — Name — Consider

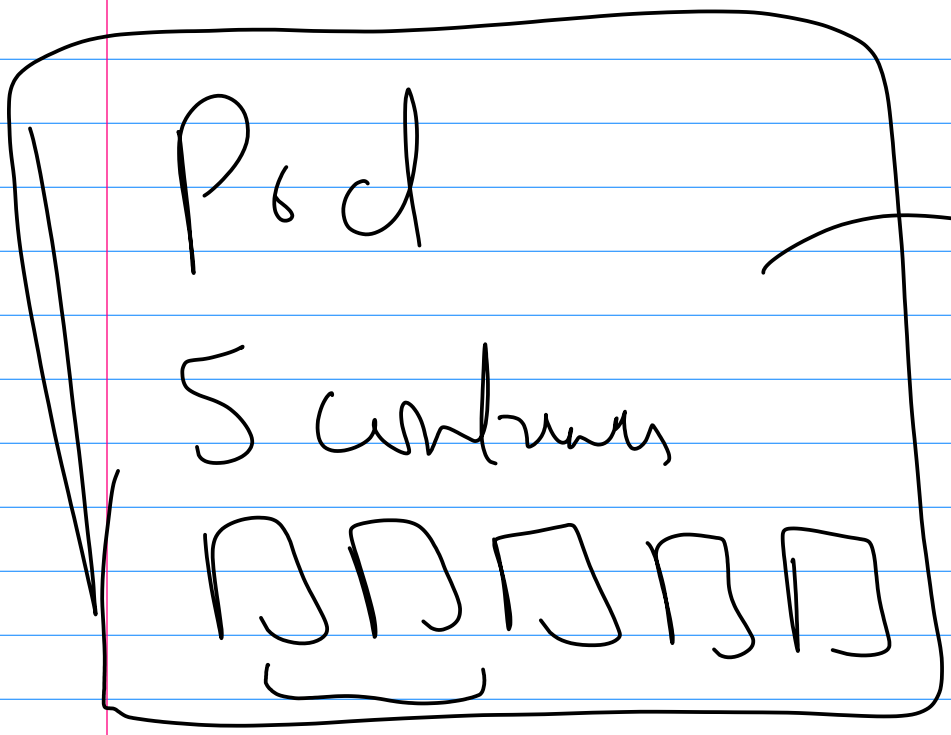
Worker Node



Pods → Container

Group

Pods with multi-container will always run in a single worker node

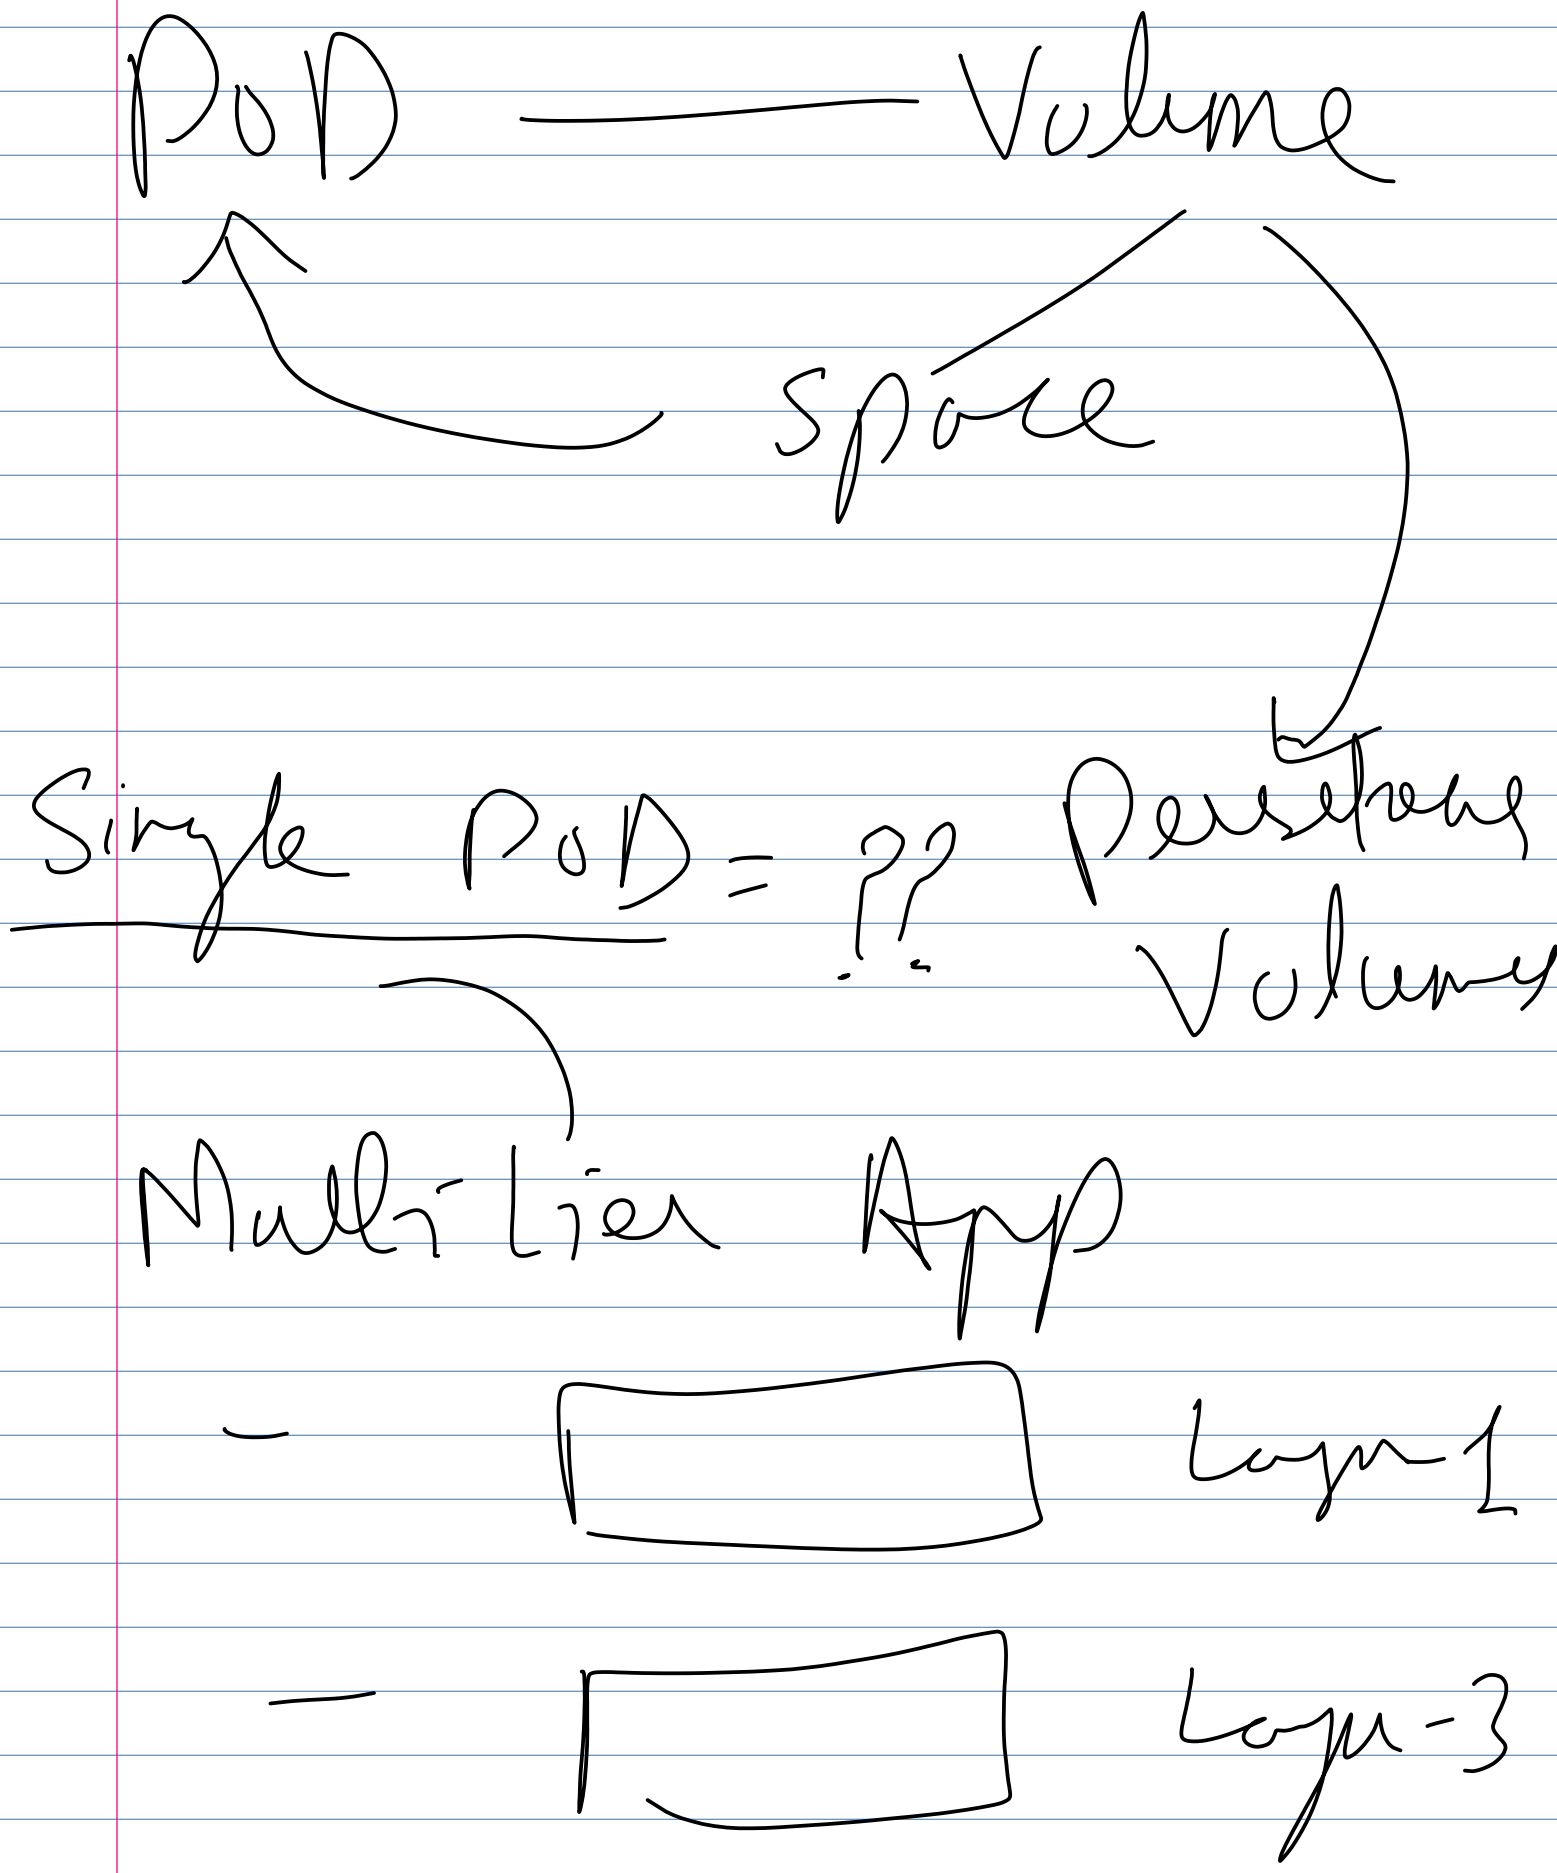


Pods ——> group of containers

Example

C1 —— File

C2 ——> read



POD
Volume
space
Single POD = ??
Persistent Volume
Multi Tier App
Layer 1
Layer-3

Richard

Creating POD

Yaml File

Specs/definition

1) kind = POD, Job, Service, Deployment
2) API Version :
3) Metadata }
4) Specs }
